

What's Wild In Ohio

April Featured Presentation

Kindergarten to 4th Grade

Students will learn what it means to be wild.

Academic Content Standards

Kindergarten:

Living things have certain characteristics.

Living things are found in different areas around the world and have physical traits to help them survive.

1st grade

Living things can only survive in environments that can support their needs.

Living things have basic needs; many come from the environment in which they live.

2nd grade

Plants and animals live in distinct environments.

Living things interact with their physical environment.

3rd grade

Traits and structures of plants, relationship between individuals and the environment

4th grade

Behavior patterns, habitat, and anatomy.
